

MID COAST-PARKVIEW HEALTH

2020 Vision

*Planning together for the future of healthcare
in the Mid Coast community*

VISION

Over the next decade, Mid Coast-Parkview Health will continue its leadership in **transforming** healthcare for the communities we serve by focusing on the following priorities:

An organization that not only takes care of patients when they become sick, but also takes responsibility for the health and well being of our community.

An organization that is easy to access and navigate and is committed to delighting the customer. Caring is at the heart of what we do.

An organization that uses a team approach to managing the quality and cost of healthcare across all settings, engaging the patient, employers and the healthcare team in the process.

An organization that continuously measures and improves everything we do and engineers safety, technology and reliability into our clinical practices to achieve superior outcomes.

An organization that actively engages with the community to plan for and meet changing needs, and provides a first place to turn for high-quality healthcare, close to home.
