

Employee Assistance Program

The **Mid Coast–Parkview Health Employee Assistance Program (EAP)** is a voluntary, work-based program offering free and confidential counseling services to help employees cope with a wide range of personal issues.

The goal of the program is to lessen the impact of these issues on many areas, including your work performance, and to give you tools to best handle life's demands at home, on the job, and in your community.

For more information contact the EAP Program Coordinator, **Tom Kivler**, LCPC, CCS at **373-6972** or **tkivler@midcoasthealth.com**.
